ABOUT ME

Aspiring Machine Learning Engineer with expertise in Data Engineering, Python, Git, SQL, and AI/ML. Passionate about contributing to innovative projects and continuously improving my skills.

EXPERIENCE

AI Intern | July 2025 - October 2025 (*Octakaigon Bock Private Limited*)

- **Fine-tuned an LLM for the Bock Autonomous Vehicle system**, improving real-time perception and object detection accuracy.
- Optimized data pipelines and training workflows to enhance model throughput, latency, and deployment scalability.
- Debugged and resolved pipeline, training, and deployment issues, ensuring reliable end-to-end perception performance.

EDUCATION

BMS College of Engineering (2022 – 2026)

- B.E. – AIML | 7.93 CGPA

SFS High School (2020)

- SSLC | 93.9%

New National PU College (2020 – 2022)

- Pre-University Education (PCMB) | 94.8%

TECHNICAL SKILLS

- **Programming Languages:** Python, C, Java, SQL
- **Core Skills:** Object-Oriented Programming, Data Structures, DBMS
- **Machine Learning & AI:** Deep Learning, Neural Networks, NLP
- **Tools & Platforms:** Jupyter Notebook, GitHub, Scikit-Learn, Pandas, Keras, Hugging Face, VS Code

Projects

HIV Predictor

- Developed an HIV Prediction Model by analyzing different ML models and performing data preprocessing.
- Skills: Data Preprocessing, Model Analysis, Fine-tuning
- Tools: Jupyter Notebook, GitHub, Python, Scikit-Learn, Pandas

Domain Drift Detection Pipeline (Histopathology)

- Developed a statistical drift detection system to compare two histopathology image datasets using FID-based mean/covariance distance and a custom tanh-normalized drift scoring function
- Skills: NLP, Deep Learning
- Tools: Jupyter Notebook, GitHub, Python, Keras, Hugging Face

Portfolio

- Designed a personal portfolio website showcasing skills and projects.
- Skills: HTML, CSS, JavaScript
- Tools: VS Code, GitHub

Spam Detection

- Developed a high-accuracy Spam Detection system using TF-IDF and Multinomial Naive Bayes.
- Skills: Machine Learning, Text Classification, API Development
- Tools: Python, Scikit-Learn, Flask, Docker, GitHub

Text-to-Image Generation

- Developed a Stable Diffusion-based text-to-image generation pipeline using Diffusers and PyTorch, enabling high-quality image synthesis from natural language prompts.
- Skills: Deep Learning, Diffusion Models, Model Fine-tuning, Prompt Engineering
- Tools: PyTorch, Hugging Face Diffusers, Stable Diffusion, GitHub

Extra Curricular Activities

- Active Member, Chirantana (Kannada Club, BMSCE) – participated in cultural events (Rangotsava, Jnana Sudhe), enhancing communication, teamwork, and confidence.
- Active Member of Gradient, Machine Learning Club of BMSCE which has been helpful in my technical skills improvement and team building abilities

Additional Information

Soft Skills: Adaptability, Team Collaboration, Communication, Problem Solving, Continuous Learning

Languages : English, Kannada, Hindi

Interests: Cricket, Anime
